Serial No: 10/686,249

Filing Date: October 15, 2003

Title: METHOD OF OBTAIN BIOLOGICALLY ACTIVE COLLEGEN FROM SKINS OF THE SALMONIDAE FISH

Examiner: Marsha M. Tsay

Art Unit: 1653

July 17, 2006

Attorney's Docket No.: PRO202

TRANSMITTAL LETTER

Hon. Commissioner of Patents and Trademarks
P.O. Box 1450, Alexandria, VA 22313

SIR:

Transmitted herewith for filing is:

<X> AMENDMENT dated July 12, 2006 (9 pages)

(X) The applicant hereby petitions the Commissioner of Patents and Trademarks to extend the time for response to any Office Action outstanding in the above captioned matter as necessary to avoid abandonment of the application. Please charge my deposit account No.11-0224 in the amount required to cover the cost of the extension. Any deficiency or overpayment should be charged or credited to the above account.

(X) The Commissioner is hereby authorized to charge any fees under 37 C.F.R. 1.16, and 1.17, after a mailing of a Notice of Allowance under 37 CFR 1.18 or any additional fees which may be required during the entire pendency of the application, or credit any overpayment, to Acct. No.11-0224. A duplicate copy of this sheet is enclosed. If and only if account funds should be insufficient, immediately contact our associate, Lisa Zumwalt, at (703) 415-0579, who will pay immediately to avoid deprivation of rights.

() Please charge my Deposit Account No.11-0224 in the amount of \$_____. A duplicate copy of this sheet is enclosed.

A signature or signatures required for the above recited document(s) is (are) provided herebelow. Such signature(s) also provide(s) ratification for any required signature appearing to be defective in the above recited document(s).

AMENDMENT

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

SIR:

This is in response to the Office Action mailed on April 17, 2006, and setting a shortened statutory period for response of one month to expire on July 17, 2006. The Commissioner is hereby authorized to charge any deficiency and/or additional fees, which may be required to Account Number 11-0224.

Applicants further respectfully request that this response be accepted as a bona fide effort to meet any potential response requirements outstanding and due in the above captioned matter.

Please amend the application as follows:

Please substitute the second paragraph on page 7 by the following:

--

The last operation is the filtering which must be done in septic conditions. Filters of natural silk are used because of the similarity of both proteins - the fibrin of the silk and the collagen. By filtering through different density filters, at least 20 times, the pigment and elements of the cells are separated, the pH is increased to the value of 5.5 to 6.0, and the characteristic smell is eliminated. In every filtering process new filters are used. The obtained product is packed in sterile glass jars hermetically closed. Till the first use it shows stability during one year. The dorsal parts of the skin are of graphite colour as they contain, apart from collagen, dissolved pigment. These are used to restore the nature colour. The middle parts have light graphite colour resistant to temperature above 30°C. The abdominal fragments of the skins – cosmetic collagen, whitish in colour and characterised by quick penetration through the epidermis. ~~epidemne~~
